Generate®

FOR CROPS

VERSATILE SOIL & PLANT HEALTH

Generate® stimulates microbes in the soil for greater nutrient uptake, healthier plants and improved soil and plant health.

Stimulate the Microbes

Stimulate the billions of microorganisms per acre that liberate nutrients in your soil.

Increase Nutrient Uptake

Utilize more of the vital nutrients crops require to meet their genetic potential. Make the most of your inputs and maximize plant health with **Generate**®.

Improve Plant Health

Crops treated with **Generate**® have greater root structure, are typically greener and are better able to withstand the effects of stress.

Increase Yield

Generate® consistently increases crop yields year after year. Stimulating soil microbes results in more profit.

HOW IT WORKS

Generate® utilizes **Microbial Catalyst**® technology to stimulate existing microbes in the soil by unlocking enzymes that drive more efficient nutrient utilization. Our patented chemistry behind **Microbial Catalyst**® technology works like a key to unlock enzymes and release nutrients that would otherwise remain tied-up in the soil.

GENERATE® ADVANTAGE ACROSS ALL CROPS:

- Improved emergence
- Greater root mass
- Larger biomass
- Taller plants
- Improved stress tolerance
- Increased yields
- Improved plant & soil health

DIRECTIONS FOR USE:

Mix 1 pint per acre.
See label for complete instructions.

COMPATABLE WITH:

Liquid fertilizer, herbicide, fungicide, insecticide and water.

AVAILABLE IN:

- 2.5 gallon jug

GUARANTEED ANALYSIS

Cobalt (Co)	1.04%
Copper (Cu)	0.28%
Iron (Fe)	0.56%
Manganese (Mn)	0.26%
Zinc (Zn)	0.22%
